## **ATTACHMENT B**

### **Items and Information to be Seized and Searched**

All information that constitutes evidence of a violation of Title 18 U.S.C. § 2119 (carjacking), and Title 18 U.S.C. § 924(c) (use of a firearm during the commission of a violent crime) committed on October 26, 2023, involving unknown persons, including location information and identifying information as specified below.

1. T-Mobile/US Cellular/AT&T shall provide responsive data for each search area described in Attachment A, and are required to disclose to the United States all records and other information (not including the contents of communications) about all communications made and all cellular device interactions with the network that have generated location information that falls within the defined search area during the corresponding timeframe(s) listed in Attachment A, including records that identify:
  - a. The unique identifiers for each wireless device that generated a Timing Advance “true call” record within the search area for each location, including International Mobile Subscriber Identifiers (“IMSI”, International Mobile Equipment (“IMEI”), and the make and model of the device;
  - b. The starting and ending date/time of the connection along with the duration, originating/terminating phone numbers, and type of communication (voice/text/data);
  - c. For each communication with the network, the tower and the sector(s) (i.e. the face(s) of the tower(s)) that received a radio signal from the locally served wireless device for both starting and ending points of the communication;
  - d. The service type for the communication; and;
  - e. The estimated latitude and longitude (along with confidence level) and the distance from the tower for both the starting and ending points of

the communication contained within the Timing Advance “True Call”,  
LOCDBOR records, or similar.

2. These records should include records about communications and cellular device interactions with the network that were initiated before or terminated after the timeframe(s) identified in Attachment A if some part of the communication occurred during the relevant timeframe(s) listed in Attachment A.
3. It is anticipated that identifying information will be requested for devices whose characteristics meet any of the following criteria:
  - a. Devices whose cellular network records; including distance from the tower and/or network derived latitude and longitude; are consistent with the facts of the investigation and would not solely reflect a device passing through.
4. However, it is noted that no subscriber information outside the initial search criteria is authorized by this warrant and additional legal process will be submitted.
